

RETHINKING TOURISM

for a whole new experience

**ASHWAJIT
SINGH**

MD Speaks

The world celebrates World Tourism Day on September 27. The relevance of the travel sector in society, the economy, politics, and culture is highlighted on this day. Since it employs millions of people, who rely on it for their living, tourism is one of the most important industries in the world. World Tourism Day this year has greater relevance because the topic, **“Rethinking Tourism”**, is on re-imagining the sector’s expansion. The UNWTO emphasises the need to reconsider how we do tourism; we cannot go to the previous modes of operation. This entails prioritising the well-being of people and the environment and uniting everyone, from local communities to enterprises, under a common vision for a more resilient, inclusive, and sustainable industry.

As shown in the SDG8 (‘Decent Work and Economic Growth’) section, tourism, a key driver of development, was one of the economic sectors most severely impacted by the Covid-19 epidemic between 2019 and 2020. This had a significant impact on jobs, small companies, and conservation efforts.

Different policy frameworks have acknowledged the necessity for these measurement tools to guide their efforts and so help to more evidence-based policymaking as countries strive to build back better and more sustainably and resilient tourism.

41 Countries recognize the value of tourism to achieve all 17 SDGs

Decent Work & Economic Growth

Responsible Consumption & Production

Partnerships for the Goals

Life below Water

Sustainable Cities & Communities

Fact Check!

The forecast from the WTTC's latest Economic Impact Report (EIR), shows the sector's contribution to the India's economy could reach almost ₹15.9 trillion (U.S. \$215 billion) in 2022, 1% above 2019 levels. Employment levels are set to grow to almost 35 million Travel & Tourism jobs, with an 8.3% growth this year.

TANYA SINGH

Editor's Desk

According to UNWTO tourism statistics, this industry generates more than 15% of global incomes and employs close to 10% of the global labor force. In 2022, we acknowledge the opportunities that travel has brought and continues to bring to communities from all over world. Tourism must be revisited and reinvented with a new concept and ideology which is brought to our lives with the motive of rethinking tourism with a new lens.

This year the theme for World Tourism Stands- **"Rethinking Tourism"**. It aims to spark discussion about reevaluating tourism for development, especially through education and employment, as well as the industry's impact on the environment and potential for more sustainable growth.

There has been a transformation in the tourism industry's economic advancement and cultural diversity. After the pandemic, we've seen the sector change, the world has once again opened for the travelers, and the economy has grown. **The tourism sector, which contributes 9% of the global GDP, employs one out of every 11 people.** Additionally, the number of visitors has doubled over the previous 20 years, and all market segments are expected to undergo spectacular expansion in the years to come. The tourism industry has great potential for growth and revenue generation.

This year we emphasised on our Tourism Campaign with the theme- My First Trip Post Covid, the pandemic was a time where tourism was the most neglected sector. We launched our social media campaign, where we wanted to reiterate the concept of tourism in all our lives and encourage everyone to share entries related to their first trip post covid. This rejuvenated the spirit of tourism and cultural diversity amongst all of us.

Turning the pages of history...

World Tourism Day

Since 1980, the United Nations World Tourism Organization has celebrated World Tourism Day as international observances on September 27. **This date was chosen as on that day in 1970, the Statutes of the UNWTO were adopted.** The adoption of these Statutes is considered a milestone in global tourism.

https://en.wikipedia.org/wiki/World_Tourism_Day#:~:text=Since%201980%2C%20the%20United%20Nations,a%20milestone%20in%20global%20tourism.

ANIL
RANSAL

Director Urban Infrastructure
and Tourism

Tourism has been central to the realisation to the realisation of SDGs – a fact recognised by over 40 countries globally in their Voluntary National Reviews. Contributing greatly to both economy and employment, it is heartening to note that over the next decade travel & tourism will create 126 million new jobs worldwide. The sector is going strong but with the pandemic fear looming, this year's theme of "Rethinking Tourism" is a stark reminder to reflect on the importance of tourism for long term sustainability and equitable growth."

SURAJ
KUMAR

Associate Director Urban
Infrastructure and Tourism

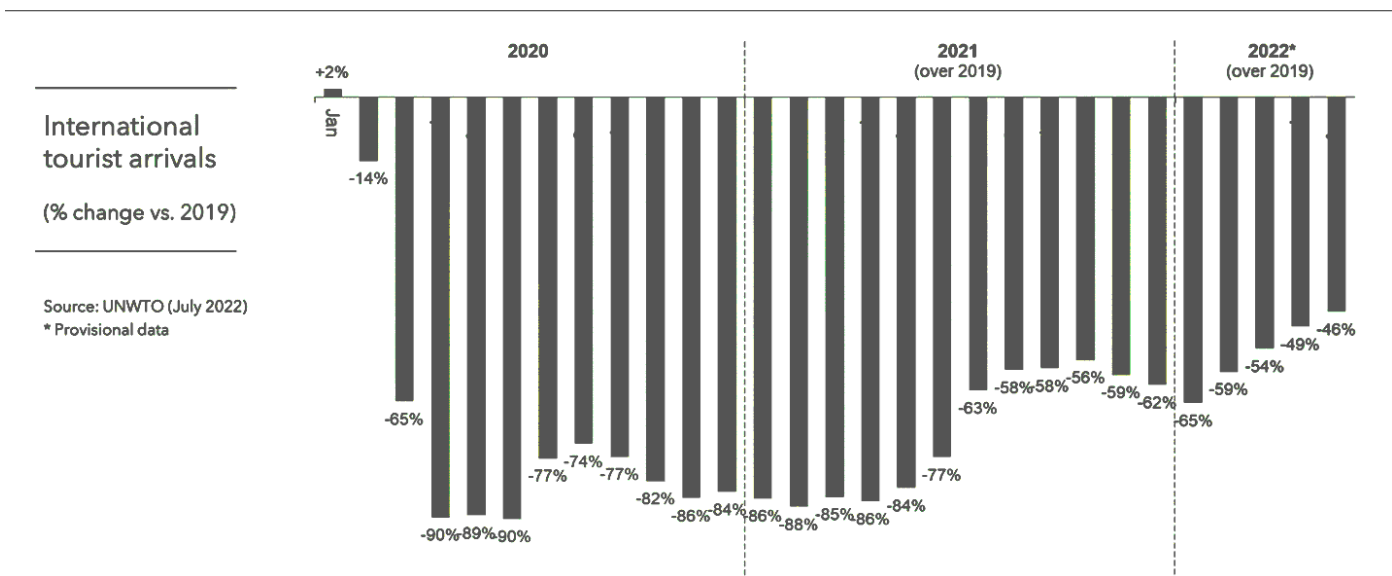

With a deep sector experience across geographies and project footprint in over 15 states of India and Sri Lanka, Indonesia, and Bangladesh, we realise the significance and potential of the sector to both its contribution to a nation's GDP and livelihoods. Believing in 'Responsible Tourism,' some of our recent works include working on India's 1st water villa project in Lakshadweep; Tehri lake becoming a top-notch experiential tourism destination in Uttarakhand, Pine-needle products been established as a signature souvenir and livelihood source for thousands of women in Himachal and Aves Island in Andaman's offering a never before like luxury-island-forest tented accommodation. Our success story is attributed to our young and passionate team of architects, planners, engineers, and environmentalists who ensure that environment sustainability is deeply engrained in all our project plans and development works.

Latest from the Sector

International tourism continues to show signs of a strong and steady recovery...

International Tourist Arrivals

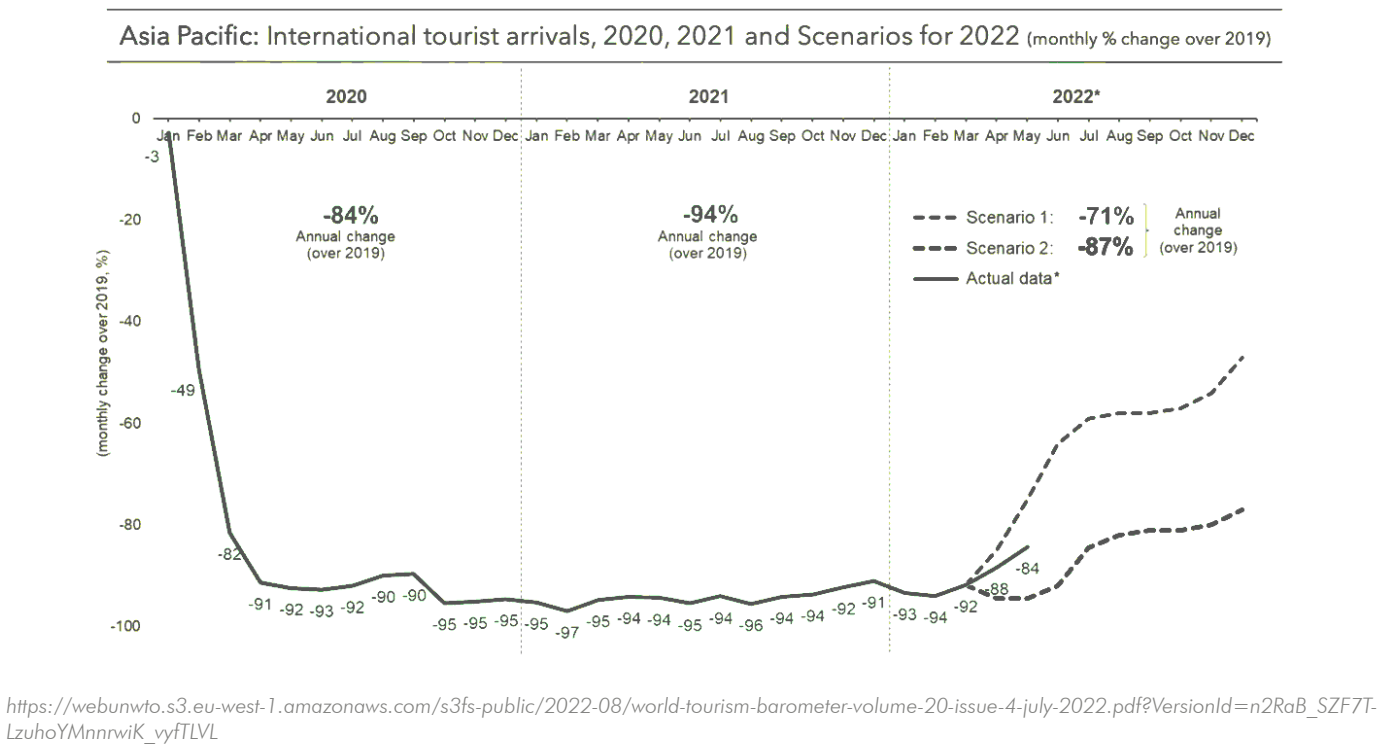

A strong rebound in the first five months of 2022, with almost 250 million international arrivals recorded. This compares to 77 million arrivals from January to May 2021 and means that the sector has recovered almost half (46%) of pre-pandemic 2019 levels.

<https://www.unwto.org/news/international-tourism-consolidates-strong-recovery-admidst-growing-challenges>

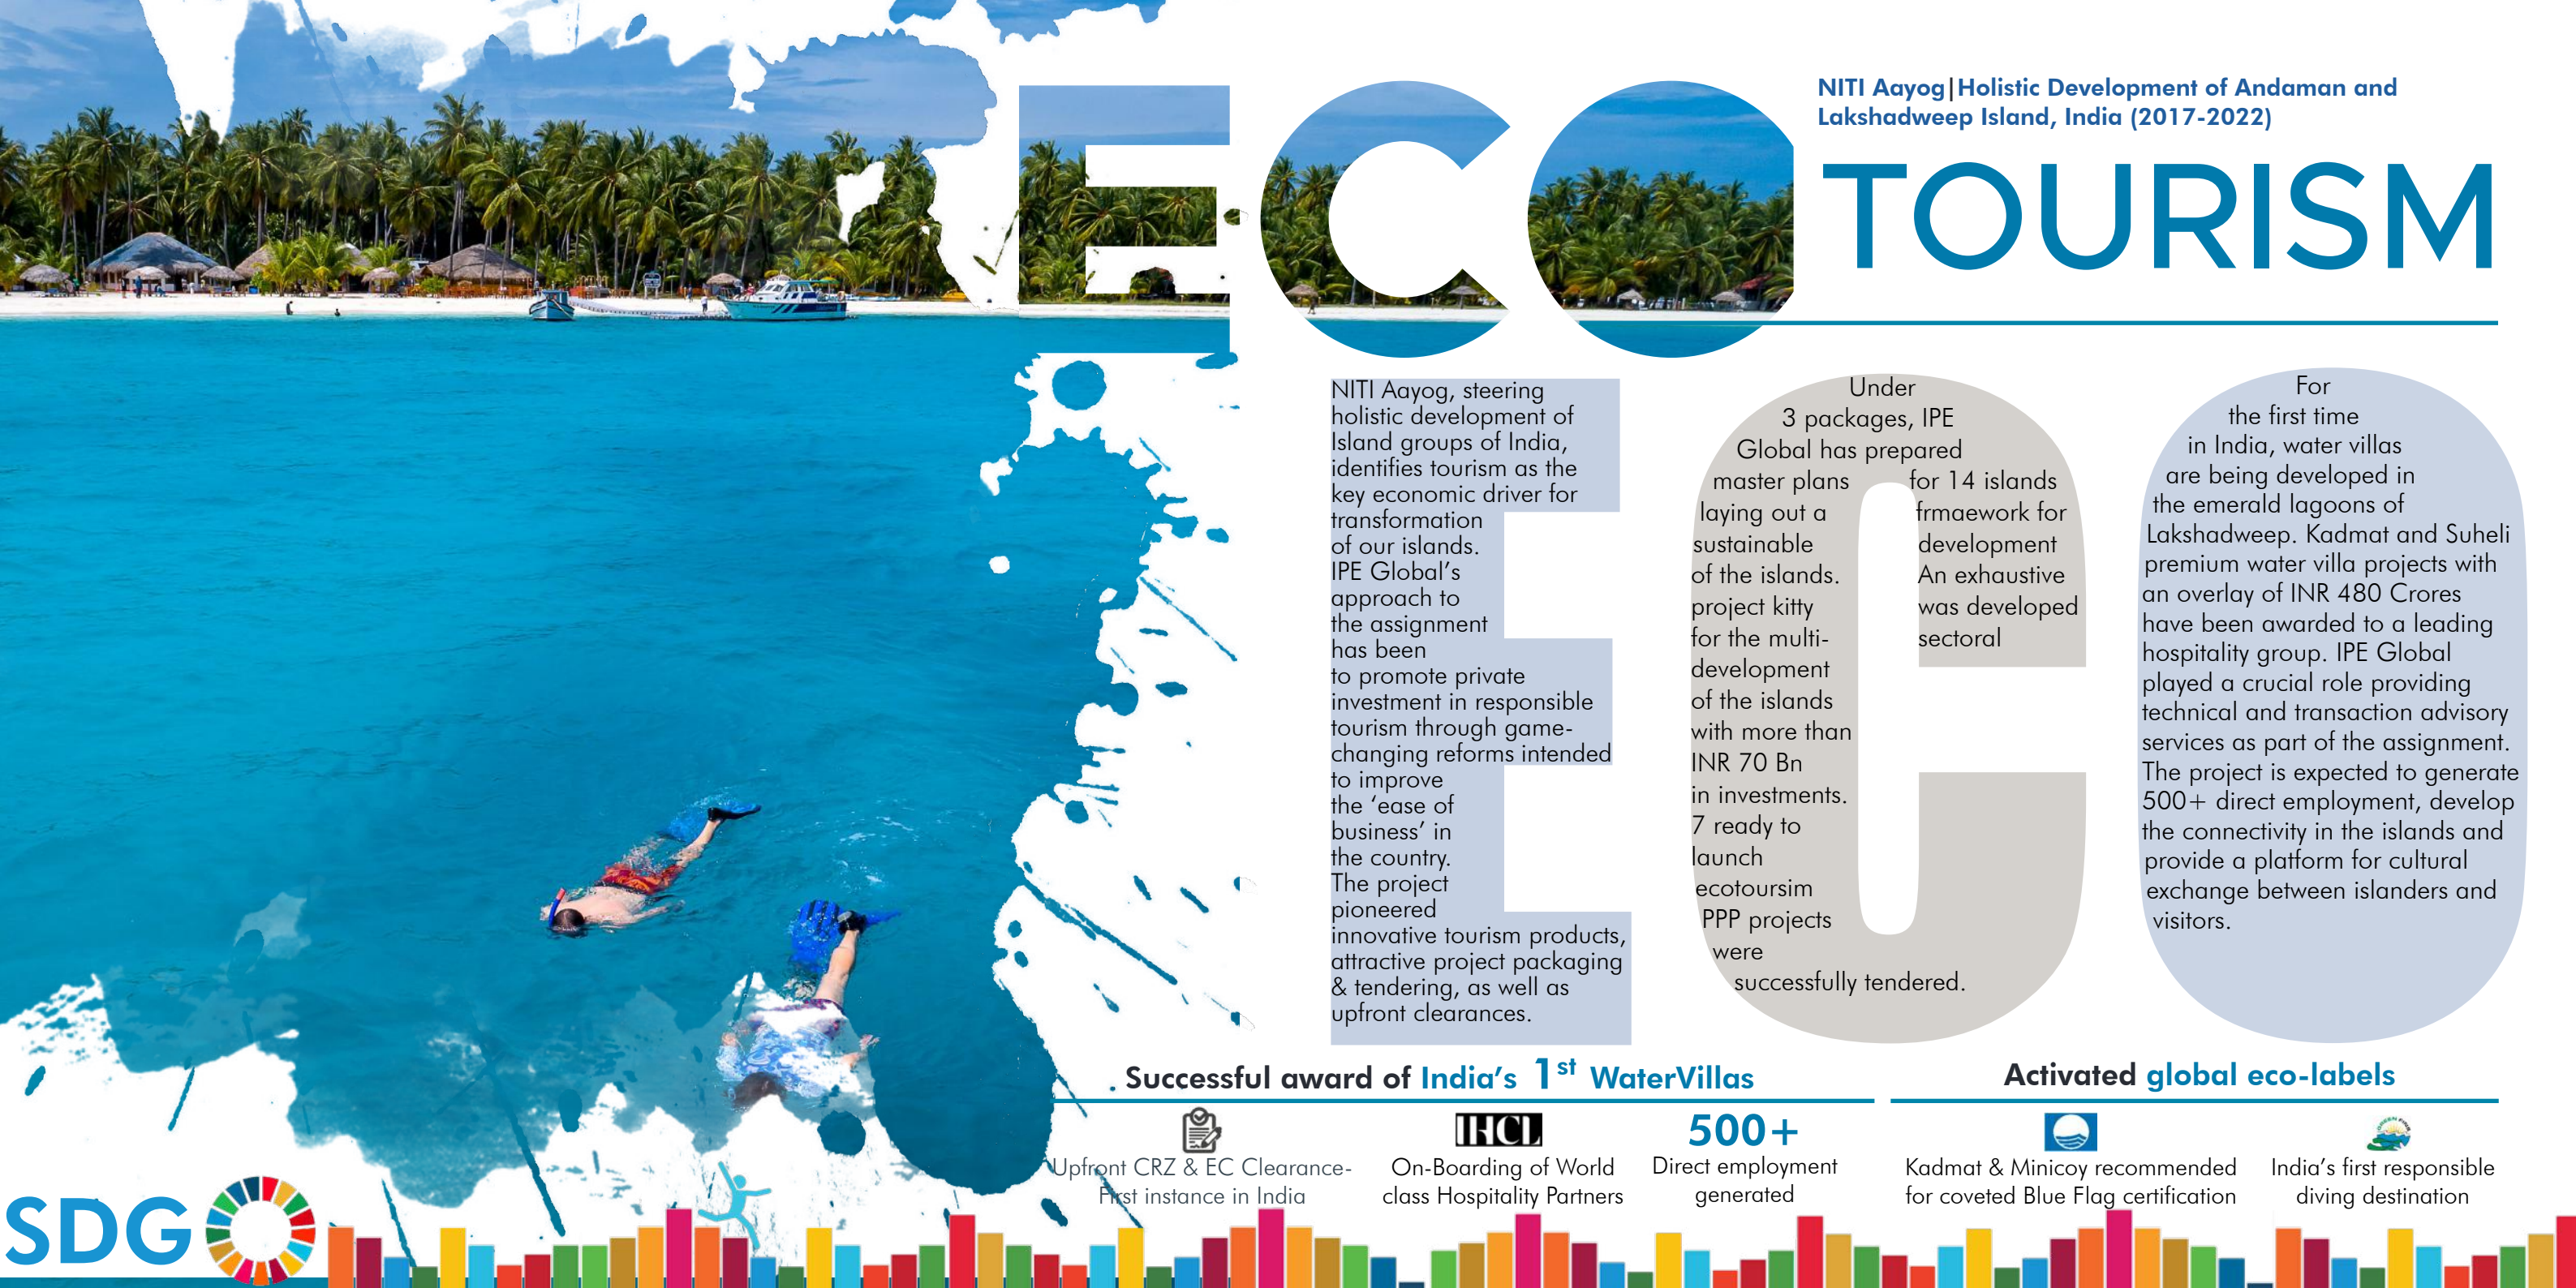

Spending on Tourism

International expenditure by tourists from France, Germany, Italy and the United States is now at 70% to 85% of pre-pandemic levels, while spending from India, Saudi Arabia and Qatar has already exceeded 2019 levels.

NITI Aayog | Holistic Development of Andaman and Lakshadweep Island, India (2017-2022)

TOURISM

NITI Aayog, steering holistic development of Island groups of India, identifies tourism as the key economic driver for transformation of our islands. IPE Global's approach to the assignment has been to promote private investment in responsible tourism through game-changing reforms intended to improve the 'ease of business' in the country. The project pioneered innovative tourism products, attractive project packaging & tendering, as well as upfront clearances.

Under 3 packages, IPE Global has prepared master plans for 14 islands laying out a sustainable framework for development of the islands. An exhaustive project kitty was developed for the multi-sectoral development of the islands with more than INR 70 Bn in investments. 7 ready to launch ecotourism PPP projects were successfully tendered.

For the first time in India, water villas are being developed in the emerald lagoons of Lakshadweep. Kadmat and Suheli premium water villa projects with an overlay of INR 480 Crores have been awarded to a leading hospitality group. IPE Global played a crucial role providing technical and transaction advisory services as part of the assignment. The project is expected to generate 500+ direct employment, develop the connectivity in the islands and provide a platform for cultural exchange between islanders and visitors.

TOURISM

(Female: 3500+) have been fields - adventure activities water sports, fishing & trekking guides, handicraft production such as pine needle craft, for instance, in cuisine & housekeeping, homestay management, etc.

- » Around **7,000+** people trained till date in various such as mountaineering, angling, bird watching, training in hospitality sector, etc.
- » Pine needle handicrafts weaving training was conducted for **40 SHGs in Solan District**
- » **20+** Homestays were assisted in establishment/ registration.
- » Self Help Groups (SHGs) trained under the project were given spaces at selected commercial/ cultural establishments made under the project to showcase their handicrafts and products
- » Awareness campaign amongst school students were conducted about clean street and clean village through plays and competitions.
- » Trainings on sensitisation on gender issues and safeguard issues to individuals and govt. officers

“Tourism was one of the most affected sectors due to COVID-19. The economic impact of which can be gauged from the situation in Sri Lanka which was highly reliant on Tourism.

What started as Revenge Tourism post lifting of pandemic restrictions is now limping to normal. However, the priorities of travelers have changed. Most are now seeking a healthy refuge largely due to fast-paced lifestyles to rejuvenate themselves both physically and mentally for an overall wellness.”

Assisted the state government in submitting the project proposal of **INR 8800** crores and obtained the central government's in-principle approval for development of tourism products such as smart, innovative, and eco-friendly tourist infrastructure, model homestays, conservation of heritage structures, upgradation of trek routes, etc.

Department of Tourism, Government of Karnataka | Preparation of Coastal Master Plan for the three Coastal Districts in Karnataka, India (2015-2020)

TOURISM CIRCUIT DEVELOPMENT

The IDIPT is an ADB funded project that envisages environmentally sustainable and socially inclusive tourism development in the Indian state of Himachal Pradesh. It proposes 22 marketable theme-based clusters and 25 new theme-based circuits along with 25 investment projects for developing tourism infrastructure in Himachal Pradesh.

One of the important components of the program was preparation of 'Tourism Infrastructure Sustainable Development Plan' for Himachal Pradesh. The plan provides actionable steps that will be implemented in short, medium, and long-term phases and provide framework to strengthen the existing regulatory mechanism for enhancing the tourism sector in the State. The plan outlines the priority areas and investible projects to be implemented through PPP mode and prepare its pre-feasibility report.

Rs 4.39 crore
Urban Infrastruc-
ture Develop-
ment Programme
(RUIDP) for

building this
faecal sludge treatment plant.
Apart from the money used for
building the FSTP, Rs 22 lakh was
used for buy-
ing vacuum
trucks of 1,000 and 4,000 litre.
Around 42 lakh was also allotted
for operation and maintenance
(which will be under the
contractor Divija Construc-
tion Private Limited, based in
Jaipur, Rajasthan) of the plant and
five-years Build
Transfer (BOT)
signed between
lika, RUIDP and
the contractor
post building of
the treatment
plant in 2019. But
90 per cent (around Rs 3 lakh) of the
population in Lalsot tehsil lives in the
rural areas.

The treatment plant start-
ed operating, but received
only a small amount of
sludge, around 2-3 KLD
during the dry season (the
t r e a t m e n t plant did not
receive any sludge on
some days) and 15-6 KLD
during the monsoon. The
sludge received was much
below the de-
and the treat-
ment plant was
underutilised. Also, according
to the Opera-
tion and Main-
tenance contract, the contractor has to
complete at least 900 desludging trips
per year. The desludging operators were
receiving calls from rural areas
to empty their c o n t a i n m e n t

Hear from the team

Thinking Sustainability is not enough, we must think regeneration. Tourism provides us with an opportunity to appreciate our Natural assets, let's practice regenerative tourism next time when we are on a visit.

Vineet Trivedi

Manager, Urban Infrastructure & Tourism

As important as tourism accessibility is, it is also important for it to be a continuous source of nurture both economically and culturally; it is also important that it is in harmony with the environment. Rethinking tourism should extend beyond the concept of opportunity provision to the preservation and enhancement of sustainability. It should be able to engage tourists in the creation of a sustainable and perpetual natural environment while also accepting their regional sustainability ideologies. It is critical because nature and the environment are not something we inherited from our forefathers, but rather something we have borrowed from our children.

Sakshi Godara

Technical Project Coordinator, Preparation of Tourism Master Plan, Bangladesh

Travel and tourism are traditionally centered around the journey of self-discovery driven by the curiosity to explore and experience the unfamiliar.

I truly believe that tourism potential is directly related to the region's public perception, which is all about the narrative people buy into. With focus on developing rural circuits with a strong storyline it is possible to leverage high value, responsible tourism as a key economic driver even at locations not boasting conventional tourism assets.

Shiven Trivedi

Assistant Manager, Urban Infrastructure and Tourism

As pandemic paused the global tourism industry, it gave us the opportunity to rethink our ideologies that define our practices. For me, mindful tourism that not just preserves the natural and cultural integrity of the destination but also builds and empowers them is the way to go!

Komal Agarwal

Senior Manager, Urban Infrastructure and Tourism

Re booting travel and tourism in a post pandemic world throws up challenges of safe and sustainable tourism paradigms that keep local communities and key stakeholders as the focus. Harnessing the renewed interest in travel will necessitate developing new tourism circuits that target different geographies and circuits. Designing and implementing simple yet sustainable models for such an approach presents opportunities for changing how to approach Tourism 2.0. Glocal tourism will be a major driver of emerging tourism prospects.

Arushi Chandra

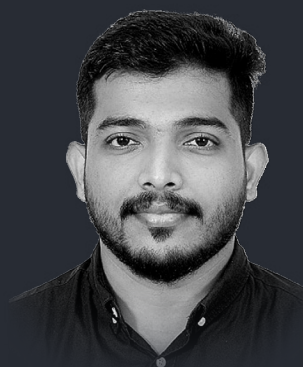

Assistant Manager, Urban Infrastructure and Tourism

The huge loss tourism industry has faced during Pandemic has impacted many lives. Fortunately, slow recovery is on its way, emphasising the need of 'Rethinking Tourism'. Rethinking is not only needed by all stakeholders for speedy revival but also to make tourism industry more resilient, responsible and sustainable.

Rupali Sahu

Project Manager, Preparation of Tourism Master Plan,
Bangladesh

The pandemic underlined the critical need for transforming the tourism sector. As global tourism slowly recovers, the road to Rethinking Tourism lies in setting up sustainable and socially responsible tourism. For the future, we must strive for innovation and collaboration in our development approach thus enabling a smart and responsible tourism model globally.

Mithun S. Anand

Manager, Urban Infrastructure and Tourism

The era of pandemic has given us all time to rethink our lifestyles and reconsider our priorities. Similarly, after a tremendous halt to the tourism industry, it has given us a chance to reconcile our operations and reink the tourism sector in a resilient manner. In all our projects, we have been trying to incorporate this ideology toward a sustainable and resilient tourism.

Sumit Kuliya

Urban Planner, Preparation of Tourism Master Plan,
Bangladesh

“Take only memories,
leave only footprints.”
